

DEVELOP A PYTHON SCRIPT

Date	21-10-2022
Team ID	PNT2022TMID08724
Project Name	Smart Waste Management System for Metropolitan cities
Maximum Mark	4 Marks

Script:

The image shows a side-by-side comparison of a Python script and its execution. On the left, a code editor window titled 'python.py - C:\Users\H175\Desktop\python.py (1118)' displays the following code:

```
a=int(input("enter the no:"))
b=int(input("enter the no:"))
if a>b:
    print("a is greater")
else:
    print("b is greater")
```

On the right, a terminal window titled 'cmd (1118)' shows the execution of the script. It displays the Python version and path, followed by the command to run the script. The output shows the user entering '4' for 'a' and '5' for 'b', resulting in the message 'b is greater'.

```
a=int(input("enter the no:"))
b=int(input("enter the no:"))
if (a>b):
    print("a is greater")
else:
    print("b is greater")
```
